

Matthew R. Titchenal, Ph.D.

Professional Profile

Dr. Titchenal specializes in accident reconstruction and the biomechanics of injury. His background in mechanical engineering and orthopaedic biomechanics includes experience in dynamic analysis and control, motion capture, vehicle dynamics, failure analysis, magnetic resonance imaging (MRI), laser scanning, medical device design, and sports-related injury.

Prior to joining InSciTech, Dr. Titchenal performed interdisciplinary research at Stanford University, studying post-traumatic knee osteoarthritis after sports injury with the Departments of Mechanical Engineering and Orthopaedic Surgery.

Credentials and Professional Honors

Stanford University

Ph.D. Mechanical Engineering – August, 2018
M.S. Mechanical Engineering – June, 2014
Stanford Bio-X Bowes Graduate Research Fellow (2015-2018)

California Polytechnic State University

B.S. Mechanical Engineering – June, 2012

FARO Technologies

FARO Laser Scanner Authorized Technician – May 2019

Award winner

2016 O'Donoghue Sports Injury Award – American Orthopaedic Society for Sports Medicine (AOSSM)
2019 Kappa Delta Elizabeth Winston Lanier Award for Outstanding Orthopaedic Research – American Academy of Orthopaedic Surgeons (AAOS)

Reviewer, American Journal of Sports Medicine

Reviewer, Journal of Orthopaedic Research

Reviewer, Arthritis Care and Research

Publications

Peer-Reviewed Journal Articles:

Titchenal MR, Williams AA, Chehab EF, Asay JL, Dragoo JL, Gold GE, McAdams TR, Andriacchi TP, Chu CR. Cartilage Subsurface Changes to MRI UTE-T2* 2 Years after Anterior Cruciate Ligament Reconstruction Correlate to Walking Mechanics Associated with Knee Osteoarthritis. *American Journal of Sports Medicine*. 2018 Mar;46(3):565-572.

Titchenal MR, Chu CR, Erhart-Hledik JC, Andriacchi TP. Early Changes in the Knee Joint Center of Rotation during Walking Following Anterior Cruciate Ligament Reconstruction Correlate with Later Changes in Patient Reported Outcomes. Winner of 2016 O'Donoghue Sports Injury Award. *American Journal of Sports Medicine*. 2017 March;45(4):915-921.

Titchenal MR, Asay JL, Favre J, Andriacchi TP, Chu CR. Effects of high heel wear and increased weight on the knee during walking. *Journal of Orthopaedic Research*. 2015 Mar;33(3):405-11.
